1. Mayrovitz HN (2005)
   *Tissue water in arms of women with postmastectomy lymphedema*
   ISBS October 2005, Philadelphia

   *Assessing local tissue edema in postmastectomy lymphedema*
   Lymphology 2007;40:87-94

   *Skin tissue water and laser Doppler blood flow during a menstrual cycle*
   Clinical Physiology and Functional Imaging 2007;27:54-59

   *Measurement decisions for clinical assessment of limb volume changes in patients with bilateral and unilateral limb edema.*
   Physical Therapy 2007 (October) 87:(10) 1362-1368

   *Localized Tissue Water Changes Accompanying One Manual Lymphatic Drainage (MLD) Therapy Session Assessed by Changes in Tissue Dielectric Constant in Patients with Lower Extremity Lymphedema*
   Lymphology 2008;41:87-92

   *Local tissue water changes assessed by tissue dielectric constant: Single measurements versus averaging of multiple measurements*
   Lymphology 2008;41:186-188

   *Local Tissue Water Assessed by Dielectric Constant: Anatomical Site and Depth Dependence in Women Prior to Breast Cancer-Related Surgery*
   Clinical Physiology and Functional Imaging 2008;28:337-342

   *Suitability of Single Tissue Dielectric Constant Measurements to Access Local Tissue Water in Normal and Lymphedematous Skin*

   *Lymphedema: Role of Truncal Clearance as a Therapy Component.*
   Home Health Care Management & Practice 2009;21(5):325-337

10. Mayrovitz HN (2009)
    *The Standard of Care for Lymphedema: Current Concepts and Physiological Considerations.*
Assessing Lymphedema by Tissue Indentation Force and Local Tissue Water
Lymphology 2009;42:88-98

Local Tissue Water in At-Risk and Contralateral Forearms of Women with and without Breast Cancer Treatment-Related Lymphedema
Lymphedema Research and Biology 2009;7(3):153-8

Local Tissue Water Assessed by Measuring Forearm Skin Dielectric Constant: Dependence on Measurement depth, Age and Body Mass Index
Skin Research and Technology 2010;16:16-22

Programmable Intermittent Pneumatic Compression as a Component of Therapy for Breast Cancer Treatment-Related Truncal and Arm Lymphedema
Home Health Care Management & Practice 2010;22:397-402

Pre-Surgical Biophysical Lymphedema Assessments of Patients with Breast Cancer: Potential Utility of Local Tissue Water Measurements.
Proceedings of the 22nd International Congress of Lymphology (Lymphology 43(Suppl), 2010) 21-25 September 2009 • Sydney, Australia (in press)

Male-Female Differences in Forearm Skin Tissue Dielectric Constant
Clinical Physiology and Functional Imaging 2010;30(5):328-332

Spatial Variations in Forearm Skin Tissue Dielectric Constant
Skin Research and Technology 2010;16:438-443

Changes in Tissue Water and Indentation Resistance of Lymphedematous Limbs Accompanying Low Level Laser Therapy (LLLT) of Fibrotic Skin
Lymphology 2011;44:168-177

Gender Differences in Facial Skin Dielectric Constant Measured at 300 MHz
Skin Research and Technology 2012;18:504–510

A randomized controlled trial comparing two types of pneumatic compression for breast cancer-related lymphedema treatment in the home
Support Care Cancer 2012;20:3279-3286

Skin Tissue Dielectric Constant Values in Women with Breast Cancer: Pre-Surgery and One Year Post-Surgery
Skin Tissue Water Assessed via Tissue Dielectric Constant Measurements in Persons with and without Diabetes Mellitus
Diabetes Technology & Therapeutics 2013;15:60-65

Forearm Skin Tissue Dielectric Constant Measured at 300 MHz: Effect of Changes in Skin Vascular Volume and Blood Perfusion
Clinical Physiology and Functional Imaging 2013;33:55-61

Biophysical Measures of Skin Tissue Water: Variations within and among Anatomical Sites and Correlations between Measures
Skin Research and Technology 2013;19:47–54

Forearm Skin Tissue Dielectric Constant Measured at 300 MHz: Effect of Changes in Skin Vascular Volume and Blood Perfusion
Clinical Physiology and Functional Imaging 2013;33:55-61

Biophysical Measures of Skin Tissue Water: Variations within and among Anatomical Sites and Correlations between Measures
Skin Research and Technology 2013;19:47–54

27. Mayrovitz HN, McClymont, Pandya N (2013)
Skin Tissue Water Assessed via Tissue Dielectric Constant Measurements in Persons with and without Diabetes Mellitus
Diabetes Technology & Therapeutics 2013;15:60-65

Subepidermal moisture surrounding pressure ulcers in persons with a spinal cord injury: a pilot study

Tissue dielectric constant (TDC) measurements as a means of characterizing localized tissue water in arms of women with and without breast cancer treatment related lymphedema
Lymphology 2014;47:142-150

Patterns of Temporal Changes in Tissue Dielectric Constant (TDC) as Indices of Localized Skin Water Changes in Women Treated for Breast Cancer: A Pilot Study

Assessing Localized Skin-to-Fat Water in Arms of Women with Breast Cancer via Tissue Dielectric Constant Measurements in Pre-Surgery and Post-Surgery Patients

34. Mayrovitz HN, Grammenos A, Corbitt K, Bartos S. (2015) Young adult gender differences in forearm skin-to-fat tissue dielectric constant values measured at 300 MHz Skin Research and Technology - 131 (in press)

37. Mayrovitz HN, Mahtani SA, Pitts E, Michaelos L (2015) Race-Related Differences in Tissue Dielectric Constant Measured Noninvasively at 300 MHz in Male and Female Skin at Multiple Sites and Depths. Skin Research and Technology - 134 (submitted-07/26/15)
